

JLG Forklift Parts

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove started out on a cross country RV voyage. After spending many years establishing his family built crane company with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road trip.

While on their journey, John spent time talking to previous business contacts whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered a vast marketplace for a product that could quickly and securely elevate people in the air to accomplish maintenance and other building services.

Upon returning from their travels, John established a joint venture with two friends and acquired a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty personnel, they created and sold the first JLG aerial work platform. The business incorporates some of the simple design elements of that original lift into current designs.

JLG forklifts have come a long way from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. These days, the business proudly continues to expand itself into different marketplaces globally and develops new products to make certain clients are capable of being more effective and perform in the workplace within a safer atmosphere.
