

## Pulp Clamp

Pulp Clamp - There is a variety of forklift accessories accessible so as to make the equipment much more efficient. A snowplow attachment could be mounted to the front part of the lift truck. A scoop bucket could be helpful when the job requires transferring gravel, snow, sand, or soil. A double block handler permits the person operating the forklift to lift\carry 2 loads and then stack them beside each other. Lots of of these accessories are extremely great for light to medium tasks.

Among the forklift accessories, called a package lift clamp, allows for the transferring and carrying of really heavy pallets. Pallet crane forks are also used so as to transfer and lift pallets by using an overhead crane. A drum clamp accessory is helpful for moving very heavy drums from place to place with out having to utilize a pallet. Lift truck mounted hoppers allow materials to be transferred and dumped without having to do it manually. These hoppers are self dumping when the bumper is released.

There are even attachments available that could transform the forklift into a commercial broom or mop. Those attachments are ideal for cleaning boat docks, storehouse floors and parking areas. Forklift mounted platforms are accessible outfitted with dual entry doors and can be hooked up to move employees from one site to another. The mounted platform accessory is nice for reaching parts which are hard to access, especially if you have goods or materials stored in out of the way locations or way up high.

It is a versatile option to put in lift truck accessories that could immediately transform a forklift truck right into a mobile crane unit. This equipment is really useful with regards to transferring loads which may be uneven or difficult. This attachment could either be telescopic, mounted on the carriage itself, or be fixed or lift truck mounted.
